RELEASE NOTES: **PBXWARE DVD**

NEW IN THIS RELEASE

- Updated wanpipe to 7.0.3
- Added 'update-system' command.

The CLI wizard will guide the user step-by-step through gentoo updates:

- Portage sync
- Security checks (if any of the installed packages have known vulnerabilities, by checking DB of this information)
- Update of base system
- Update of user installed packages
- Configuration merge and cleanup

This command puts everything in the correct order and ensures that commands are correct. It will not do magic in any situation, but is just to make sure support follows the correct procedure.

- NTP problems fixed
- The netsetup wizard is now a single binary file
