Wait Time	00d 00h 00m 00s	00d 00h 00m

ACD Queues

The intelligent ACD queuing in PBXware provides the user with easy to create queues. Whether it is giving music on hold, random announcements, or even just assigning agents to queues, PBXware's advantage is that it provides all these complex features in an easy to use, user-friendly interface.

ACD Queue Features

- Easy Queue Setup
- Music on Hold
- Periodic Announcements
- Agent Announcements
- Agent Whisper
- Call Recording
- Agent Auto-Fill
- Queue Statistics
- Agent Groups

Ring Strategies

- Ring All - Ring all assigned phones
- Round Robin - Ring Agents in succession, one after another
- Least Recent - The agent with the longest wait time
- Fewest Calls - The agent that has taken the least calls
- Random - Randomly distribute calls
- Round Robin Memory - Remember where one left off

The screenshot shows the 'Advanced' configuration page for an ACD Queue. At the top right, there is a 'wrench' icon and the word 'Advanced'. Below this, a list of agents is shown under the heading 'Agents: All Agents, Groups and Users'. The list includes: Agent/1000 - Agent Smith, Agent/1002 - No: 1, Group/1 - Lobby, Group/2 - Sales, Group/3 - Dev, SIP/1140 - barba, SIP/1004 - Carl Madsen, SIP/1102 - Emma Thomspen, SIP/1105 - Jason Portland, and SIP/1003 - Joanna Cox. Below the list is a 'Skill Set:' dropdown menu, a yellow arrow icon, and an 'Add Agent' button. Underneath is a 'Members' section with a list containing 'Agent/1001 - Agent Jones'. Below the members list is a 'Remove Agent' button with a red 'X' icon. Further down, there are several configuration options: 'Priority:' set to 'None', 'Called Agents:' with radio buttons for 'Yes' (selected), 'No', and 'N/A'; 'Timeout:' with radio buttons for 'Yes', 'No', and 'N/A' (selected); 'Timeout:' set to '4'; 'Strategy:' set to 'ringall'; and another 'Timeout:' set to '4'. At the bottom right, there are 'Save' and 'Go' buttons. At the very bottom, there is a 'Notes:' field with the letter 't' and a list of notes: 'Y' - allow the called user transfer the calling, 'T' - to allow the calling user to transfer the, 'd' - data-quality (modem) call (minimum d, 'H' - allow caller to hang up by hitting *, 'n' - no retries on the timeout; will exit this application and go to the next step, and 'r' - ring instead of playing MOH.

Queue Statistics

The Call Center includes comprehensive queue statistics reports. These reports will help you achieve better customer service by forecasting call volumes, calculating agent requirements, and comparing results with expectations.

Statistics data is opened in a separate pop-up window and displays:

Queue Features

- All calls
- Answered calls
- Unanswered calls
- Call time
- Hold time
- Queue entry
- Exit position
- Minimum time
- Maximum time
- Average time
- Total time

Agents Statistics

- Number of calls
- Calls per minute
- Calls percentage
- Talk time
- Idle time
- Session time
- Number of hangups

The PBXware statistics functionality is designed to give you ad-hoc reporting when and where you need it. Simply select your date range and the required information, and PBXware presents you with comprehensive data that is flexible enough to dive through and filter by simple clicking on the areas of interest.

Real Time Displays

Real time queue - agent monitoring allows authorized user to keep track of status and traffic in each queue. Data is automatically refreshed every 3-60 seconds. The following details are displayed:

Queue Monitoring

- Name
- Total Calls
- Maximum Calls
- Calls Unanswered
- Calls Waiting
- VIP Calls Waiting

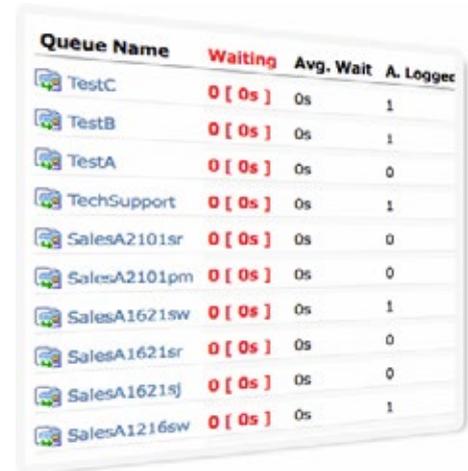

gloCOM

gloCOM CC is a call center application designed to help an entire organization have a better view of calls in progress and to provide adequate management tools to call center supervisors.

Supervisors can view all agent activity, hang-up and transfer their calls as well as monitor queues, the number of calls waiting, agents status, etc.

An entire organization can use the included wall board facility which displays major real time call statistics on a large LCD screen.

gloCOM CC also offers real-time graphs which show the above information graphically. Messages can be shared between agents and supervisors. Agents can send assistance requests from their gloCOM directly.

Call Recording

Call Center allows you to record all incoming and outgoing calls made by any extension or call agent. Audio format supported: gsm, wav, wav49 and ogg.

Important part of every call recording solution is storage and easy access to recordings. PBXware builds your call recordings right into your call reports. By combining two major functions such as reporting and call recording, PBXware gives you the ease of clicking on a Queue/Agent/Caller ID and seeing call by call all your recorded calls. Then simply click to download.

- **System Recording**
Records all calls on the system.
- **Extension Recording**
Records calls from a specific extension on the system.
- **Instant Recording**
This service records calls from the point that the activation code is entered (*159). From that point, the call will be recorded until one of the parties hangs up.
- **Ring Group Recording**
Records calls answered by any extension being a member of the Ring Group where Call Recording is enabled.
- **Agent Recording**
Records calls answered by any agent that is a member of a given queue.
- **Queue Recording**
Records calls answered by agents regardless of whether they are static, dynamic, or callback agents.

Compact Disk (CD)

The CD installation method is used to install PBXware onto a commodity PC/server hardware. The installation process installs the Linux operating system, PBXware, and all other necessary applications onto a system hard drive. Installation is easy, fast and includes everything needed to successfully install and operate the system.

Appliance

Pre-configured and loaded with the latest firmware images appliances. Our appliances are thoroughly tested for performance and compatibility and are available as:

- miniRACK
- maxiRACK
- ftRACK
- vSWITCH

SERVERware

SERVERware is a solution designed for service providers wishing to offer hosted services like PBXes, soft switches, and complete Telco-in-a-box offerings.

It has been built with redundancy, scalability, flexibility, and a very high availability from the start. SERVERware is available in two editions: Server and Network.

gloCOM

- Full Screen View

Vision Statement

We Unify Communications

Mission Statement

We provide the Communication World with the most Complete Turnkey Communication Systems available by Creating, Unifying and Supporting the Most Advanced of Current Technologies.

Overview

Bicom Systems was the first company to deliver Open Source Communications Software as Professional Turnkey Solutions.

By combining the best of open source telephony and its own proprietary software, Bicom Systems can provide enterprises with turnkey solutions that take account of the clients' exact needs within a very cost-effective framework - giving CIOs the safest choice. This mix includes royalty-free software, vibrant open source communities, available custom development backed up by accountable, professional support services.

The company finds innovative open source communication projects and professionalizes the project by creating, unifying and supporting turnkey systems with its proprietary in-house software. Bicom Systems provides the resources, core development and support services to enable popular open source projects to scale into enterprise-class communications software.
