

PBXware 5.3.10 CHANGELOG

5.3.10 - July 14, 2021

Bug Fixes & Improvements

- › Access Codes: Fixed an issue where having default and custom parking lots with the same range would cause problems
- › Access Codes: Fixed an issue where errors would be displayed on the Multi Tenant Edition in the 'Access Codes' section after a system upgrade and settings resave
- › API: Fixed an issue where all the options from IVR would be listed incorrectly
- › API: Fixed an issue where the list request was missing information on 'Last Destination' set in Ring Groups
- › API: Fixed an issue with adding, editing, or deleting CLI Routing Rules
- › Asterisk: PJSIP BLF Fixed an issue with BLFs when there is no ringing state
- › Auto Provisioning: Changed the letter 'd' to be case insensitive for Snom phones
- › Auto Provisioning: Added support for Yealink DECT IP Multi-Cell Base Station W90B and W90DM
- › Auto Provisioning: Added support for Yealink T30, T30P, T31, T31P, T31G, T33G, and T33P
- › Auto Provisioning: Added support for Alcatel M3, M7, and H2P
- › Auto Provisioning: Added support for Poly Trio 8300 Conference Phone
- › Conferences: Fixed an issue where Conference recordings on the Contact Center Edition were not visible in 'Conferences' -> 'CDRs'
- › Enhanced Services: Fixed an issue where a plus (+) sign could not be entered into the 'Call Filters & Blocking' Enhanced Service
- › Licensing: Fixed an issue so that PBXware stops only if the licensing server is unreachable for seven days or more
- › Permissions: Implemented counting outbound channels properly towards the outbound limit
- › Pin Based Dialing: Fixed an issue with incorrect call rating when using PIN Based Dialing
- › Queues: Fixed an issue where the Agent greeting was not played to Callback Agents

- › Queues: Fixed an issue where CDRs were not created properly if the 'Static Members Login' option was set to 'Yes'
- › Queues: Fixed an issue where if 'Agent answer' was set to 'Yes', the wrap-up time was not properly tracked
- › Queues: Fixed an issue where the 'Replace CallerID' option would not be applied in certain call scenarios
- › Routes: Fixed an issue where it was not possible to set a PIN when the 'Inherit' option was selected on 'Operation Times' on 'Routes'
- › Time Zone: Fixed an issue where parsing some date formats would show error messages in the GUI
- › Trunks: Added additional CallerID display functionality to the CallerID found in and out the (Tenant) DID range
- › Archiving Storage: Fixed an issue where special characters in file names would cause issues when playing recordings from a Windows FTP server
