

PBXware 5.3.8 CHANGELOG

Bug Fixes & Improvements

- › API: Updated documentation for Operation Times
- › API: Added unsupported enhanced services to allow enabling/disabling with API
- › Archiving Storage: Fixed an issue with Google Drive Code length
- › Archiving Storage: Fixed an issue with corrupted file descriptors which caused the application to stop working as intended
- › Archiving Storage: Fixed an issue where some recordings would not be uploaded due to the wrong file path being used
- › Archiving Storage: Set max concurrent uploads to 1, if the system has 1GB or less Memory
- › Archiving Storage: Updated the Amazon SDK version to v1.34.27
- › Auto Provisioning: Fixed a bug where incorrect DST information would be sent to Fanvil and Yealink devices
- › Callback Agent: Fixed a bug where the Agent would ring even though they were on a call and the option to ring in use was disabled
- › Call Rating: Skip disabled routes while checking for inbound calls
- › Conferences: Fixed a bug with playing voicemail sounds in Conferences
- › Hot Desking: Fixed a PHP issue when fetching timezone
- › Parking: Fixed an issue where wrong Music on Hold would be played on transfer to parking lot
- › Queue Members: Fixed a bug where penalty would be set to 'NaN' if a member's name contained ','
- › Transcription: Increased the URL and Key field length for IBM Watson
- › Translation: Improved Spanish translation
- › Trunks: Implemented the same naming restrictions for Custom Trunks as for Trunks
- › Voicemail: Fixed an issue where only .txt files would be deleted after sending an email if the option "Delete After Emailing" was enabled
- › Voicemail: Fixed an issue with MIME headers when sending Voicemail email
