

PBXware 5.3.9 CHANGELOG

5.3.9 - March 16, 2021

Bug Fixes & Improvements

- › API: Fixed a bug for call/pickup groups for non-MT editions where allowed groups on the system would be checked
- › Archiving Storage: Fixed an issue where recordings uploaded to FTP would not be visible in the GUI
- › Archiving Storage: Fixed an issue where a user was unable to listen/download recordings stored on the FTP server
- › Auto Provisioning: Added support for the SNOM DECT base stations M300 and M900 and SNOM handsets M25 and M80
- › Auto Provisioning: Added support for Panasonic KX-HDV230 and KX-HDV330
- › CRM Routing: Fixed an issue where the value '0' was not handled correctly in 'Rules'
- › Fixed an issue where the downloaded call recording did not display correct date/time
- › MOH: Fixed an issue where ON/OFF would have no effect in file system
- › MOH: Fixed an issue for the Contact Center edition where a designated MOH was not played correctly after a call was parked directly to the parking lot
- › Queue: Fixed a bug where Queue callback statistics would not show real talk time value if the 'Agent answer' option on Queue was set to 'Yes'
- › Trunks: Fixed a bug where there would be a missing call recording when using multiple Trunks

Added support for new endpoints

Snom M300

Snom M900

Snom M25

Snom M80

Panasonic KX-HDV230

Panasonic KX-HDV330
