

CHANGELOG

PBXware 6.7.7

bicom
SYSTEMS

wiki.bicomsystems.com

Features

- Oauth for SMTP Configuration.

Bug Fixes & Improvements

- API: Added recording path to CDR download.
- API: Added the ability to fetch Archiving reports using API.
- API: Added the ability to fetch SMS & Bulk SMS reports using API.
- API: Added the option to add/edit Name on DIDs using API.
- API: Allowed API users with limited tenant access to fetch the tenant list restricted to accessible tenants only.
- API: Added the ability to configure 'Preserve original Caller ID' for DIDs using API.
- API: Added the ability to configure 'Emergency Location Header' for Tenant and Trunk using API.
- API: Fixed an issue where listing the operation times rules using API would result in an error .
- Auto Provisioning: Added support for Snom D862/D865 devices for standard and Touchless Provisioning.
- Auto-provisioning: Added support for Snom M500.
- Auto-provisioning: Fixed the Additional Configuration issue for Snom M300/M900 devices.
- Auto-provisioning: Fixed an issue with displaying the extension's username on Snom Mxx handset devices.
- Auto-provisioning: Fixed an issue with the handset's IPEI number for Snom MXXX devices.
- Branding: Fixed an issue where the branding settings were not being applied on the 'Import from Queues' page.

- CallerID: Added the ability to force the Caller ID to be displayed in E.164 format to meet the regulatory requirements in the UK.
- Call Forwarding: Added the ability to change the default timeout value for call forwarding on the tenant level.
- CDR: Removed quotes from the Caller ID fields in User Interface and CSV Download.
- CDR: Added the ability to customize the call recording filename format.
- Conferences: Exit digit option removed from Conference settings.
- CRM: Added the option to prevent the new lead page from opening in CRM upon answered call.
- DID: Added the ability to download the DIDs CSV on tenant level.
- DID: Fixed the issue related to DID changes made over API, which caused the leading zeros at the start of the DID number to be removed.
- DIDs: Added the Name field to DID configuration on tenant level for easier management.
- Emergency services: Use the emergency services numbers set on the master tenant in case emergency services numbers are not set on the tenant.
- ERG: Added the Custom Ringtone option to the Enhanced Ring Group settings.
- ERG: Added 'Leave When Empty' and 'Empty Destination' options to Enhanced Ring Group settings.
- IVR: Added the IVR tree as a destination option in CRM routing, DID.
- IVR Statistics: Fixed the issue where Calls per Option would not show 0 in the statistics.
- LDAP: Added < and > to the list of characters not allowed to be used in passwords.
- Notifications: Added the "New Update Available" notification in the PBXware GUI.
- OSC: Added the ability to display call rating info in OSC.
- OSC: Fixed an issue where the logo added using the advanced branding would not be shown in the OSC portal.
- Recording: Fixed an issue where Tenant to tenant calls would not be recorded on both sides.
- SMS: Implemented the option to enable the SMS feature on all tenants at once through licensing.

- SMTP: Introduced Oauth for SMTP configuration.
- SP Edition: Disabled 2-step verification for SSO (Single Sign-On) logins.
- SP Edition: Display the name of the SP administrator in Action Logs after changes are made on the synced system.
- Translation: Fixed the javascript issues happening on multiple pages when the French language was used.
- Trunks: Introduced the ability to set the trunk prefix for emergency calls.
- Trunks: Removed spaces from the header names when setting additional SIP headers on a trunk.

Contact Center Module

Bug Fixes & Improvements

- Resolved the Asterisk deadlock issue when shared_lastcall was used.

New Endpoints

Snom D862

Snom D865

Snom M500
