SYSTEMS

# Table of Contents

FEATURES

Typing indicator for single and group conversations

The typing indicator is presented above the input field of the message window and within the conversation list so you can see when somebody is typing to you. In the case of a group conversation, if more than one participant is typing at the same time, the typing message will take the form "`N participants are typing" where N is the number of typing participants.
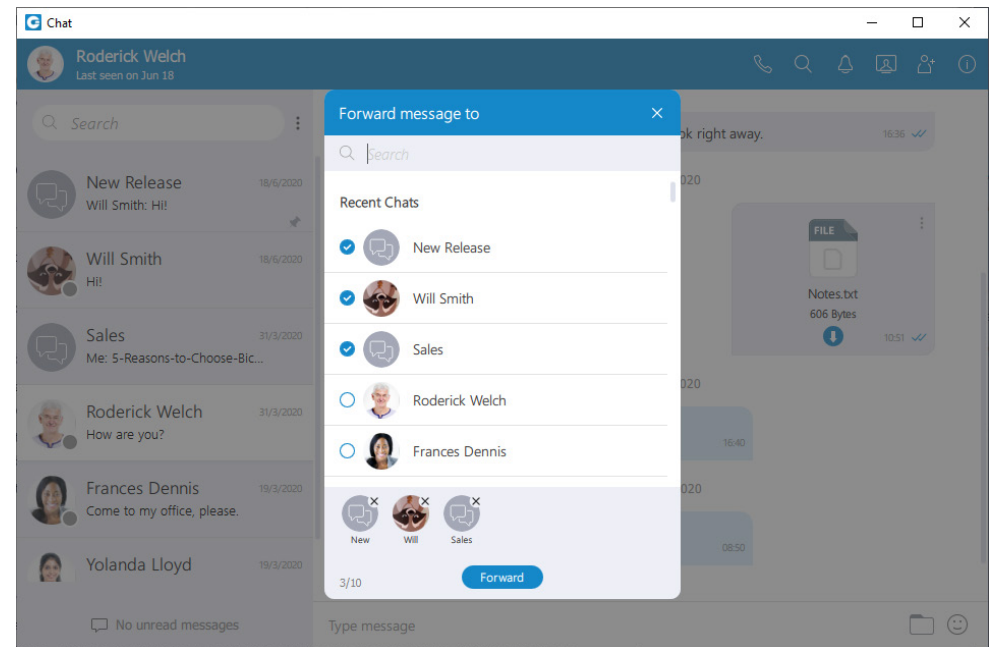

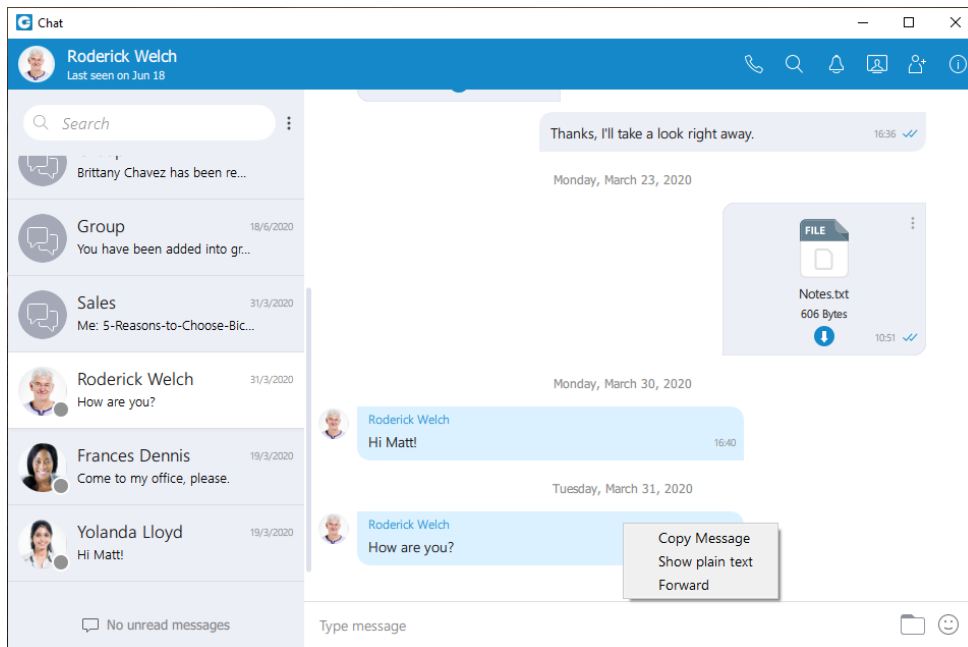

Pin chat sessions

Pin Chat allows you to pin the most used conversations on the top of the conversation list. The last pinned conversation is always on the top of the conversation list. You can unpin the conversation in the same way as pin, and also by clicking on the pin icon that appears if a conversation is pinned.
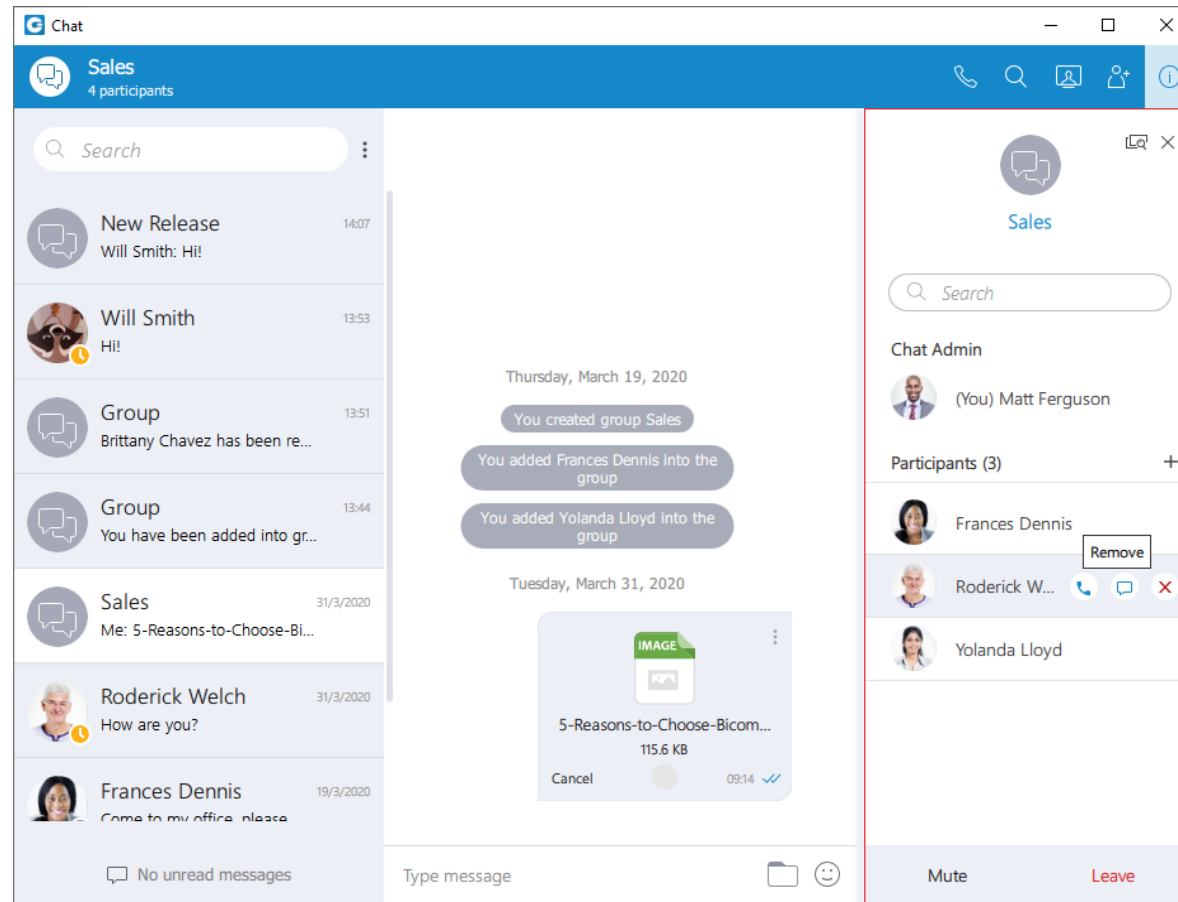

Forward textual and file messages

Forward option is used to forward messages and files from one conversation to another. You can forward the message or file up to 10 conversations at once.
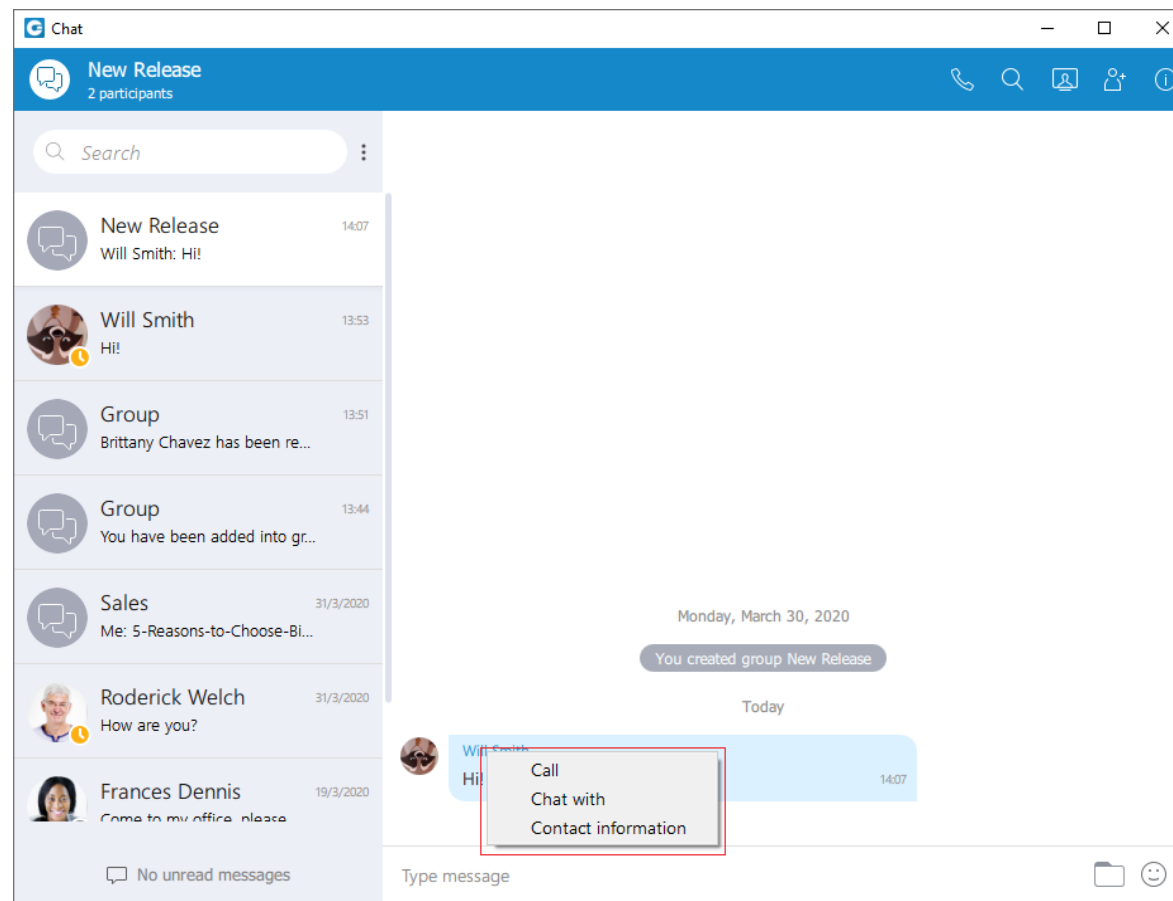

Remove chat participants

Remove the hovered participant (only available for the group administrator)

# Context menu for quick actions (chat, call, contact information)

While you are inside of the group conversation, left-click on the participant's name or avatar inside the messages window will show a popup menu with three options:

- Call - Call the participant directly
- Chat with - Start a one to one conversation with the participant
- Contact information - Show the contact information

Join a dynamic conference from history

If you missed the conference call, you are still able to join the conference from the Call History tab provided that a conference still exists. There are two ways to do that: double click on the conference number or right-click on the conference number and then choose a call or call with.

Public Meetings

Added support for public meetings. This is a meeting where everyone can join with the meeting number. There is no need to invite users. The public meeting checkbox is added in the meeting module window and in the schedule dialog.

Bug Fixes & Improvements

›   Updated German translation
›   Updated Spanish translation
›   Added support to handle compatibility issues in chat
›   Added support for finding invited participant by email for meeting
›   Replaced "kick" with "remove" in call conference screens
