Bicom Systems

- Bicom Systems researches and integrates innovative Open Source Telephony Projects to commercialize by unifying with its suite of Telecoms Management Softwares. In September 2004, Bicom Systems launched its PBXware software and became the very first company to deliver an Open Standards Turnkey Telephony System on the market.
- By unifying the best of open standards telephony and its own proprietary software, Bicom Systems provides SMBs, Enterprises, Call Centers, Governments and Telco Service Providers worldwide with turnkey solutions that take account of clients' exact needs, placed within a very cost-effective framework.

WARRANTED AND SUPPORTED
a safe choice for all organizations

SERVERware

SERVERware is a redundant, scalable, and dedicated Telephony Cloud OS platform. Easy to use GUI administration for PBXware, TELCOware, sipMON partitions. Available in server and cluster editions.

gloCOM

gloCOM is a Desktop and Mobile Unified Communications app specifically designed for PBXware. It enhances and simplifies day-to-day business communication while boosting productivity, availability and flexibility.

Business • Call Center
Multi Tenant • IP Key Systems

PBXware

World's first feature rich Professional Open Standards IP PBX Turnkey Telephony Platform. Available in **Business, Call Center, Multi-Tenant and IP Key Systems Editions**. PBXware has been deployed since 2004 on every continent worldwide.

sipMON

sipMON is a telco voice services quality monitoring tool. It is a real-time packets sniffer, collecting and storing SIP/RTP traffic, allowing administrators to analyze VOIP calls comprehensively using GUI, while allowing partners role-based GUI access and alarms/notifications.

TELCOware

Fully-featured telecom billing platform designed to operate with PBXware or, optionally, a third party telephony soft switch. From the website, sign-up and provision to subscriptions, invoices & payments - your Telco can be run turnkey.

sipPROT

sipPROT is a PBXware and SERVERware module providing protection from various SIP/TFTP attacks including DoS, DDoS, Brute Force. SipPROT operates with live SIP/TFTP traffic integrated with easy CLI administration and prevention.

IP Key Systems

IP Key Systems - a specialized PBXware edition, providing key systems and featuring auto-provisioning IP phones from Yealink and Polycom. Delivered on solid state, long life M1000 appliance and value enhanced with Bicom Systems Key Systems Console app.
The fastest phone system in the market!
