7 Highly Featured Products

SERVERware

The only Virtualization Platform dedicated to **Hosting Telephony & Unified Communications in the Cloud**. SERVERware has an easy-to-use GUI administration for PBXware, or TELCOWare, and also sipMON partitions. Available in server and cluster editions.

PBXware

The world's first feature-rich, Professional Open Standards, advanced IP PBX Turnkey Telephony Platform. PBXware is available in **Business, Call Center, Multi-Tenant and IP Key Systems** Editions. Bicom PBXware has been deployed since 2004 on every continent worldwide.

gloCOM

gloCOM is a desktop and mobile **Unified Communications app**, uniquely designed for PBXware. gloCOM enhances and simplifies day-to-day business communication while boosting productivity, availability, and flexibility.

sipMON

sipMON is an advanced **Telco voice services quality monitoring tool**. It is a superb real-time packets sniffer, collecting and storing SIP / RTP traffic. sipMON allows administrators to analyze all VOIP calls comprehensively with GUI, while allowing partners role-based GUI access and alarms /notifications.

IP Key Systems

IP Key Systems is a **specialized PBXware edition** that provides key systems & features autoprovisioning IP phones from Yealink and Polycom. KS is delivered on a solid state, long life officeBox appliance and a high value enhanced with Bicom Systems Key Systems Console app.

TELCOWare

TELCOWare is a fully - featured **Telecom -Billing Platform**, designed to operate with PBXware or, optionally, a third party telephony soft switch. From website to sign-up and provisioning to subscriptions, invoices & payments - your Telco can be run turnkey.

sipPROT

SipPROT is an advanced **Unified Comms Module** that provides **superior SIP protection** for PBXware from various SIP/TFTP attacks, including DoS, DDoS, and Brute Force. SipPROT operates with live SIP/TFTP traffic, integrated with easy administration and prevention
